Best Legend of Zelda To Date: Breath of The Wild

Nintendo releases its new open world Legend Zelda Game that revolutionizes the entire series

KYOTO, Japan, April.20, 2017— It's the new and improved Legend of Zelda you've all been waiting for! With a new open world, brand new weapons, and new ways to customize Link (The main character), this game is an instant classic that revolutionizes the Legend of Zelda series. After playing the greatest Master Piece to come to The Legend of Zelda series, fans will never want to go back to the old game.

Zelda fans will be exceptionally pleased with the changes made to the new game. Players now have the power to customize Links weapons and armor. This level of customization is unprecedented in the series and will forever change the way the game is played. Fans have been used to wearing the same old armor throughout the entire game, but now using the wrong armor in the wrong place can be deadly. This adds a whole new layer of strategy to the game never seen before. Even with all the new features, some things remain the same, like horseback riding, and being able to fight with a sword and a shield. Breath of The Wild also comes with four brand-new challenging temples, and if that wasn't enough it also has over 100 new dungeons that can baffle even the most experienced Zelda fan. With a massive open world and over 100 puzzles, players will get hundreds of hours of exhilarating gameplay, and still have more places to explore. This is the highest quality game Nintendo has ever produced and it will not only change how future Zelda games are made but all RPGS (Role Playing Games). Breath of the Wild is a block buster in the making.

"Dear Zelda fans", said Eiji Aonuma, "the new Zelda game, The Legend of Zelda: Breath of the Wild for Wii U, has finally been presented at E3. The theme for this new title is "rethinking the conventions of the Zelda series". Breaking from tradition, the player has the freedom to go wherever they wish to go, to do whatever they wish to do, in a vast open world. This is a whole new, unprecedented game in the history of Zelda. In the Nintendo booth at E3, we arranged statues of characters from the game in diorama-like settings, borrowed from the game. We wanted to entertain visitors and help them experience the world of the new Zelda game. The picture here shows Mr. Miyamoto and I bravely challenging an in-game monster called a Bokoblin. I know we are acting a bit silly for our age, but I hope this gives you a bit of a laugh."

Breath of The Wild gives players the opportunity to explore the new and improved Hyrule. The new map is Massive, and is the biggest map Zelda has ever had. Players will be able to not only travel on land via horseback but will also be able to travel by air using the new paraglider, and sea by using a raft. And if that wasn't enough, players can choose to fight the final boss whenever they choose to! Imagine getting to beat the game right when you start (If you're good enough). The freedom Breath of The Wild gives players is unfathomable! This game will be incredible to new players, and life changing to old fans. Like they say, you can take the fan out of the wild, but you can't take the wild out of the fan. Zelda will never be the same again.

About Nintendo

At Nintendo, we are proud to be working for the leading company in our industry. We are strongly committed to producing and marketing the best products and support services available. Founded in 1889, Nintendo has given the world many of its biggest gaming icons, such as, Super Mario, Zelda and Donkey Kong. Nintendo has also paved the way for motion censored gaming by releasing the Wii in 2006. The Nintendo Wii sold over 600,000 consoles in its first 8 days in America, and has shipped over 100 million units worldwide, breaking many records.
